Motivation letter

My name is José Nunes, I'm 34 years old, and I am a Frontend developer from Portugal, currently working at adidas (www.adidas-group.com). I have been a software developer for 6 years. Although I started my IT career as a Python developer, I've been working as a frontend web developer for the past 3 years. My initial tech stack was focused on vanilla JavaScript and jQuery. Nowadays, I work mainly with modern frontend web technologies in the **React** ecosystem. In fact, I've been working as a **React developer** for more than two years now. Some of the technologies I use daily in my work are:

- React
- Redux for state management
- Webpack as the bundler
- Babel to transpile both JSX and ES6
- Storybook to document React components
- npm as the package manager
- Jest/Enzyme for unit-testing
- ESLint and StyleLint for code linting
- Prettier for code formatting
- CSS modules and PostCSS (I've also worked with Styled-Components)
- redux-thunk and axios for AJAX
- Git for version control
- and the list goes on...

Right now, I'm looking to embrace a new professional challenge. I'm available to provide further information, and also to prove my skills in technical evaluations.

Best regards,

José Nunes

Recent Work Experiences

- **Adidas AG**
Frontend developer

Mar 18 - Dec 18

(REACT / REDUX)

adidas AG (www.adidas-group.com) needs no introduction. It is the largest sportswear manufacturer in Europe, and the second largest in the world. With its headquarters in Herzogenaurach, Germany, employs nearly 57,000 people around the world.

At adidas, I worked as a frontend developer, integrated in a multi-disciplinary Scrum team, in the development of a B2B React/Redux web app called "Click" ("Click" is a self-service order intake platform for small and medium wholesale customers).

- **doDOC, Corp.**
Frontend developer

Oct 16 - Feb 18

(REACT / REDUX)

doDOC (www.dodoc.com) is software development company with headquarters in Boston (USA) and Coimbra (Portugal). doDOC product is a single platform solution for secure collaboration when working with complex and regulated documents.

At doDOC, my job was to migrate the frontend (written in vanilla JavaScript and jQuery), as well as new product features, into a React/Redux SPA.

- **Soundzipper**
Web developer

Sep 15 - Sep 16

Soundzipper is a Singapore based acoustics consultancy company. I've worked (part-time) with Soundzipper as a frontend developer.

My primary role inside the company was the development and maintenance of the website (www.soundzipper.com).

- **00F**
Web developer

May 16 - Jun 16

00F (www.oof.pt) is a commercial art and graphic design company from Guimarães, Portugal. I worked with 00F to implement a website for the Social Studies department of the University of Coimbra, Portugal (www.exchange.ces.uc.pt). My job was to convert static mockups into a jQuery website with a Wordpress backend.

Education

- **PhD (Engineering)**

Jan 11 - Mar 14

- **Master of Engineering**

Sep 03 - Jun 08
