About

I've been a Frontend developer for more than 7 years. I love to build usable, accessible, and beautiful interfaces. I'm a big fan of clean, reusable, and maintainable code.

Although I started my Frontend career working with vanilla JavaScript and jQuery, I've been working with React for almost 5 years now.

Recent Projects

I maintain some personal projects I use to both improve my FE/FS development skills and to showcase some of my coding abilities. These projects can be viewed as "breakable toys".

Widy
Productivity App

REACT / TYPESCRIPT / CSS IN JS
REDUX / REACT-QUERY
NODE / EXPRESS / MONGODB

Widy is a productivity (ToDo) app. It is a typical React SPA with an Express monolith BE, with all the common features of a CRUD app.

I use Widy mainly to:

• Test and validate new code structure and architecture ideas

• Experiment new libraries and technologies

• Gain experience developing and maintaining a FS app

I'm in the process of writing Widy using a different set of technologies.

In addition to the above, I use this new version of Widy mainly to:

• Use the NestJS framework to build a REST API

• Learn TypeORM and PostgreSQL
